

Civilizations

A group of people who lived in a society together. A civilization is described by the place the people lived, what they ate and wore, and how they treated each other.

Artifact

Definition:

**An item that tells us about a place or people.
For example, these coins from ancient Greece
tell us that people back then used money to
buy goods.**

Log

Definition:

A record of information. Archaeologists write down all the information they learn while studying artifacts.

Archaeologist

Definition:

A scientist who studies how people lived hundreds or thousands of years ago.
