

## Information About Yourself

A smart device can tell you what your heart rate is. It can also tell you how much money you spent last week.

## Information About Your Community

A smart device can tell you if there is traffic near your house. It can also tell you where the nearest doctor's office is.

# What Can Smart Devices Do?

## Sounds

Some devices have sounds that tell you when to do something. For example, a sound can tell you when you should put sunscreen on outside.

## Pictures and Graphs

Some devices have pictures or graphs. For example, a graph could show you how much running you did outside during recess for the week.

## Information

Some devices have information. For example, a device could have information on if a school bus is going to be late.
