

Drone Requirements

Your drone must:

- **Track information about an endangered animal**
- **Fit into animals' habitat without disturbing or distracting animals**
- **Have a way to alert wildlife biologists if there is a problem (example: an animal is sick)**

Questions that wildlife biologists will be asking you:

- 1. What information does your drone track?**
- 2. How often does your drone go into the field to track information?**
- 3. How does your drone alert wildlife biologists if there is a problem?**
