

# Ice Architecture Criteria

## Building Requirements:

- Choose a building or attraction that will increase tourism in the area (examples: hotel, train station, museum).

## Design Requirements:

- Have a cardboard base
- Minimum of 6 inches tall and 4 inches wide
- Have a working door that opens and closes
- **Sturdy:** remains standing and does not fall over if lightly touched
- Fit a minimum of 4 small items inside (to simulate people)
- Can be any shape - the more creative, the better!

## Material Requirements:

- Incorporate “snow” that was previously created
- Use a minimum of 3 real ice cubes
- Use at least 3 other building or art supplies
