Kenny the Urban Planner: Planning Cities and Weather

Meet Kenny!

Hi everybody! My name is Kenny, and I am an urban planner. An urban planner is a person who decides what goes in a city. An urban planner makes sure that people have everything they need in a city, like schools, stores, and roads.

Share Your Ideas!

As a class, make a list of things that should go in a city. Look at the pictures for some hints!

Being an Urban Planner

I make sure that people have everything they need in a city. Here are some examples of what I put in every city!

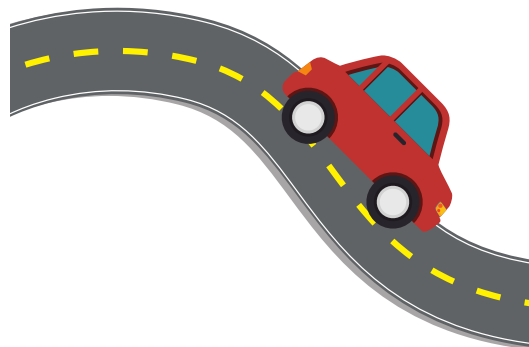

**Buildings
(schools,
houses,
hospitals)**

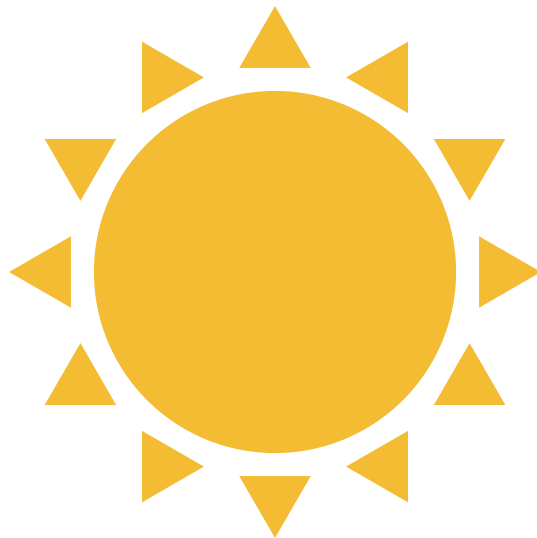

**Parks and
playgrounds**

**Roads and
sidewalks**

Learning about Weather

I think about the weather when I plan a city. I have to figure out if it rains, snows, or is sunny in a city. Why do you think I have to learn about the weather in a city?

Learning about Weather

I have to learn about the weather so I can make sure people are safe in a city. For example, if the city is really warm and sunny, I make sure people have water fountains.

Learning about Weather

**Sometimes, severe weather happens in a city.
Severe weather means the weather can be dangerous. Severe weather could be a big snow storm or lightening in the sky.**

Learning about Weather

If there is a snow storm, I make sure there are special trucks to remove the snow from the streets.
