Jennifer the Zoologist: Moving Animals at the Zoo

Meet Jennifer!

Hi everyone! My name is Jennifer, and I'm a zoologist. A zoologist works with animals at the zoo. It's my job to make sure animals have a safe and happy place to live at the zoo.

My Favorite Animal at the Zoo

My favorite animals at the zoo are koalas. As a zoologist, I make sure that koalas have bamboo to eat and climb on!

**What's your favorite animal?
How would you take care of the animal?**

Moving a Giraffe

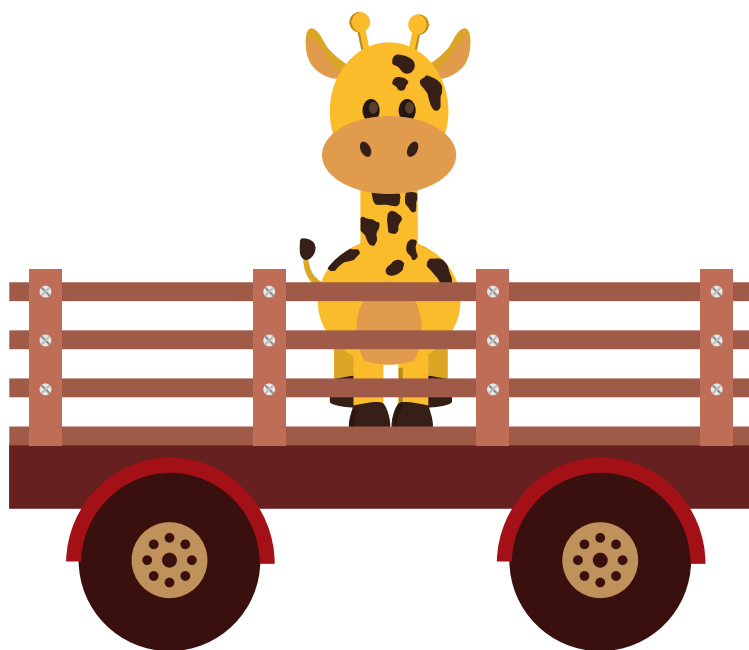

Today, I need to move a giraffe to his new home at the zoo! He is very heavy! Do you have any ideas for how I can move the giraffe? Share your ideas with the class!

Moving a Giraffe

My first idea is to have my friend pull the giraffe in a wagon. When he pulls the giraffe in the wagon, the giraffe gets closer to him. The problem is that it is taking him a long time to pull the giraffe! Do you have an idea for how he can pull the giraffe faster? Share your ideas with the class!

Moving a Giraffe

I have another idea. What if more people help pull the wagon? We can work as a team and pull the wagon together.

Moving a Giraffe

This was a great idea! When we work together, we can change the speed of the wagon. This means we can pull the giraffe faster.

Moving a Giraffe

Thanks for helping me come up with ways to move the giraffe! When we work as a team, we can move the giraffe faster!
