Greg the Architect:

Keeping It Cool

Meet Greg!

Hi everyone! My name is Greg. I am an architect! An architect is a person who designs what buildings look like.

What Does an Architect Do?

An architect designs where windows and doors will go on a building. An architect also decides where the slide will be on a playground.

Being an Architect in Mexico

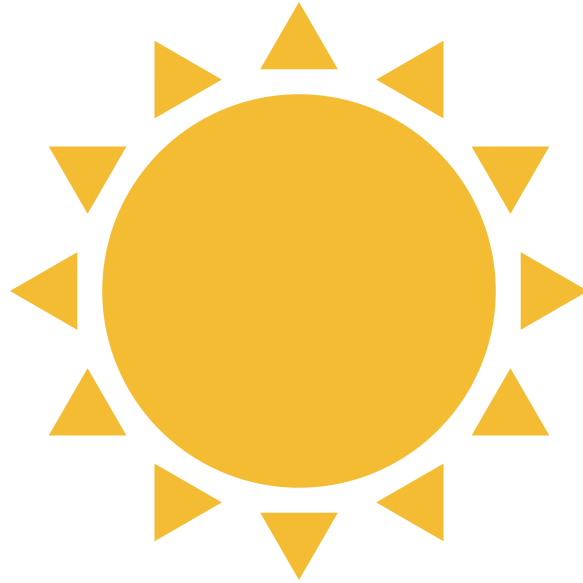

Right now, I am an architect in Mexico! Mexico is very hot during the year! The sun shines every day in Mexico.

**Can you find
Mexico on a map?
How far is Mexico
from where you
live?**

Being an Architect in Mexico

Today, I am visiting a playground in Mexico. The sun shines every day on the playground. The sun makes the playground very hot. It is hard for kids to play on the playground when it is hot.

Being an Architect in Mexico

I want to find a way to make the playground cooler and not so hot. To make the playground cooler, I need to block the sun. I am going to put a shade over the playground. The shade will block the sun! The playground won't be hot!
