## Teacher Key

**1. Do you think all people were happy while the Industrial Revolution was happening? Why or why not?**

All people were probably not happy. For example, the people who owned the factories were probably happy because they made a lot of money. People were probably happy to have jobs but they did not have safe working conditions.

**2. How did people's jobs change as a result of inventions that were created?**

People's jobs changed because machines helped them do their jobs faster. For example, sewing machines helped people sew clothing faster. There were also assembly lines that allowed each person to focus on one job.

**3. Why did people move from small towns to the city during the Industrial Revolution?**

Factories were built in cities. People moved to the cities to get jobs. Cities became more popular to live in.
