TEACHER KEY

1. **What is the difference between goods and services?**

A good is an item you can buy, sell, or use. A service is a job or task that you do for someone else.

2. **Give an example of a good. Then, give an example of a service.**

Answers may vary: A robot is an example of a good. Teaching other people how to use a robot is an example of a service.

3. **Why is the special language called code so important to computer scientists?**

It is important because code is the language that has numbers, letters, and symbols that tell the computer exactly what to do.
