

Geneticist

Someone who studies genes, which are packets of information that tell your body what traits to create. Genes are passed down from parents to children.

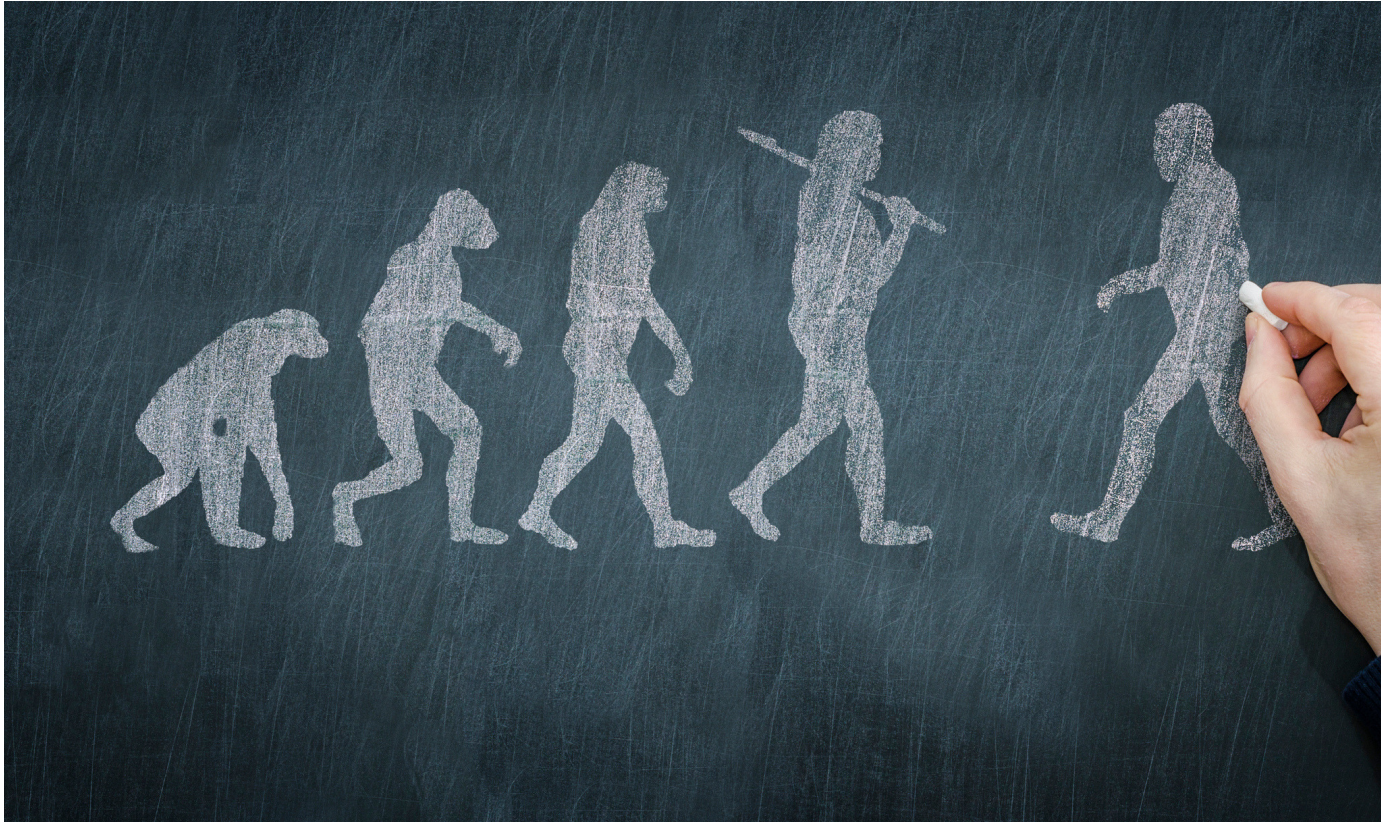

DNA

**All of your genes put together, a recipe for
how to make you!**

**Lesson: Differences Between Homo sapiens and
Neanderthals**

Neanderthals

The name of a species that lived between 400,000 to 40,000 years ago! They went extinct and are no longer alive.

Homo Sapiens

Refers to the species of humans that is alive today.
