## Teacher Key

**1. Is a letter written by Alexander Hamilton while he was at the Constitutional Convention a primary or secondary source? Explain why.**

This letter is a primary source because it was written at the time of the event.

**2. Why was the Constitutional Convention held?**

It was held to talk about changing the Articles of the Confederation.

**3. The people at the Constitutional Convention were only white men. Make a claim about why this could be a problem.**

Answers will vary. This is a problem because only the view points of white men were considered. Women and people of color did not have any voice. So, the new government would only represent what one group of people wanted.
