

Population Geographer

Someone who learns about how populations, or groups of people, change over time.

Industrial Revolution

Happened during 1790 and 1880. It was a time when lots of inventions were being made.

Population Increase

A lot of new people from countries like Italy, Poland, Germany, and Ireland moved to the United States to find jobs.

New Jobs

Before the Industrial Revolution, people worked as farmers or skilled workers such as carpenters.

After, people worked in large factories and operated machines that produced lots of items like shoes and clothes.
