## Teacher Key

**1. Pandas eat a tree called bamboo. A hotel cuts down all the bamboo trees in an area to make room for their new hotel.**

**A) Explain why this is a problem for pandas.**

If bamboo trees are destroyed then the pandas food source will be taken away.

**B) What may the pandas have to do in order to survive?**

Answers will vary. Pandas may have to move to a new area that still has bamboo or they may have to change the food they eat.

**2. A lake is polluted by a dangerous chemical. Fish that usually eat baby crabs are dying from the chemicals. What could happen in this lake?**

Answers will vary. The baby crabs could take over the lake and start eating other animals in the lake.
