

Architectural Historian

**Someone who studies the history of
buildings.**

Pit House

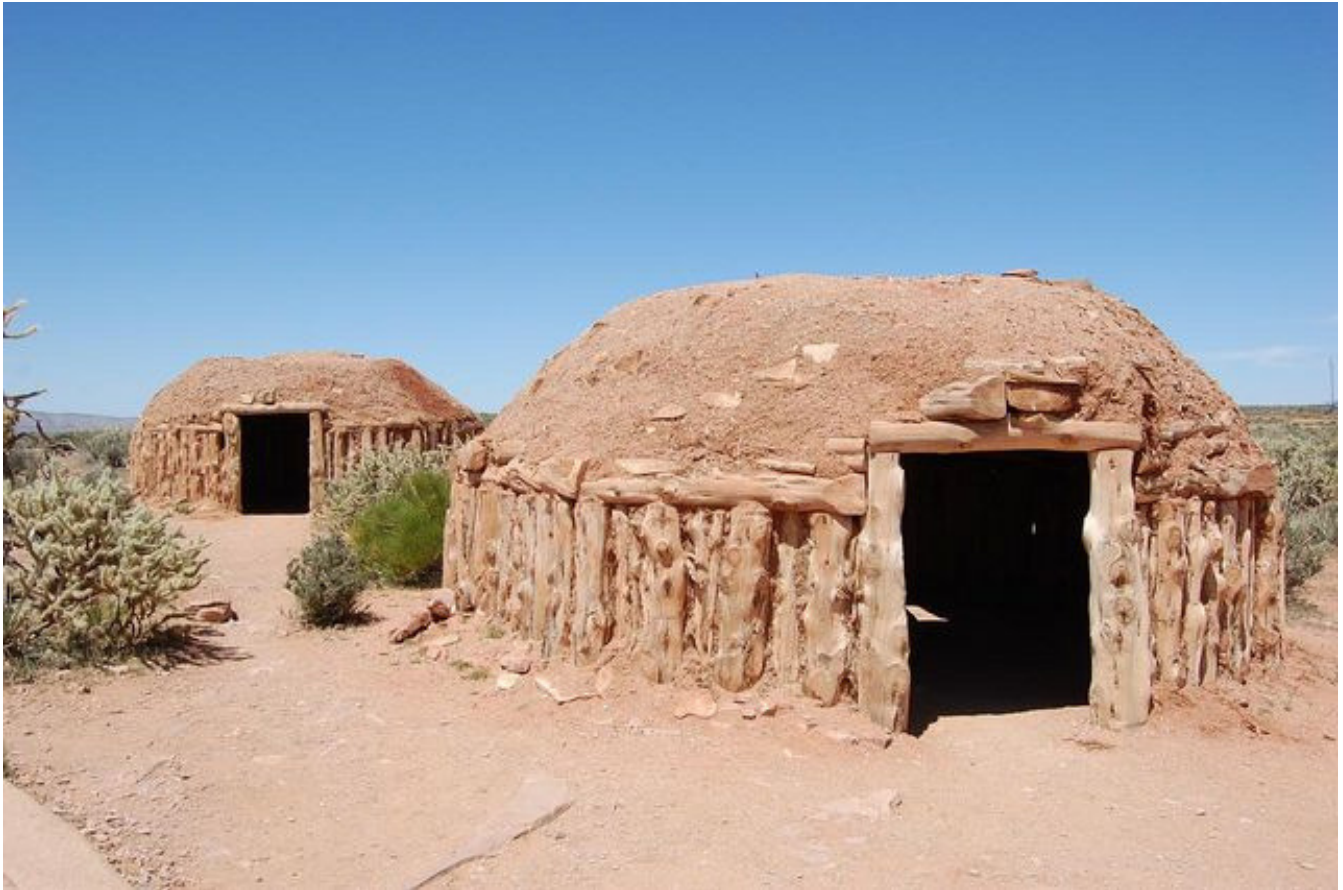

A house that was built partially underground with a roof made of branches.

Pueblo Stone House

A home built of sandstone that was taken from nearby cliffs and canyons.

Hogan

A home made of wood poles, tree bark and mud with a doorway that opened to the east.

Wikiup

A home made from branches tied together with leather thongs and then covered with dried brush gathered from the desert.
