

Astronomer

Someone who studies the scientific properties of the universe. For example, he/she studies how all of the things in the universe move in relation to each other.

Aztec Empire

Existed from the years 1300 to 1500 and no longer exists today. The civilization was known as being extremely advanced, meaning that the Aztec people created a writing system and built large cities with unique architecture.

Aztec Calendar of Stone

A stone carved out of rocks to create an Aztec calendar. The stone calendar had 365 days in it but was broken into 18 shorter months with important dates in the Aztec religion, and carved so the Aztecs knew when to perform rituals.

Ancient American Studies

Refers to the history of American civilizations that no longer exist, like the Aztec and Mayan civilizations.
